### RESULTADO DE LA CORRECCIÓN: DESAPROBADO

#### OBSERVACIONES

NO COMPILA. Error con paths como en el TP de Pilas. En el repo siguen mal configurados.

## GRUPO 06 – Correcciones Trabajo Práctico: COLAS

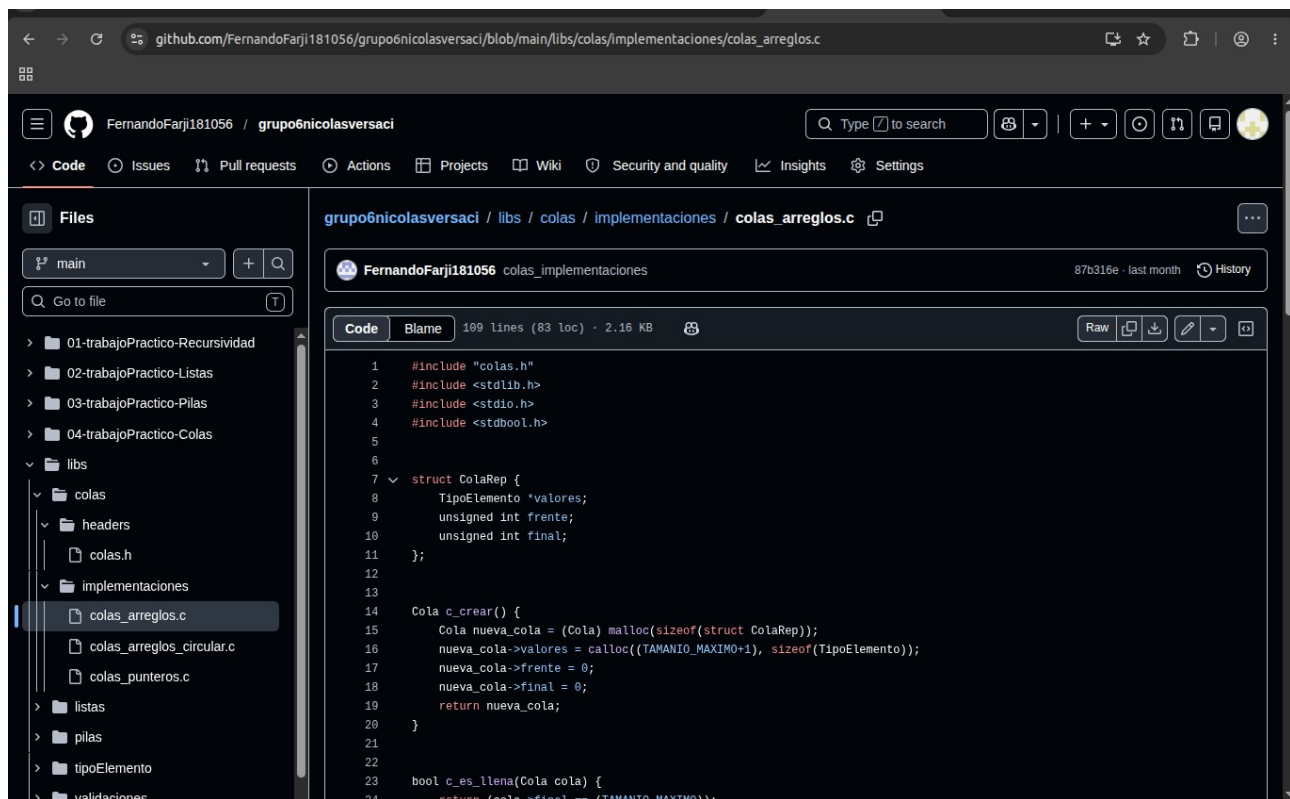

The screenshot shows a Visual Studio Code editor with a C project. The Explorer sidebar on the left shows the project structure, including files like `main.c`, `colas.h`, and `colas_arreglos.c`. The main editor displays `main.c` with the following code:

```
1 #include <stdio.h>
2 #include <stdlib.h>
3 #include <string.h>
4 #include <stdbool.h>
5 #include <ctype.h>
6 #include "../libs/validaciones/headers/Validacion_datos.h"
7 #include "main.h"
8 #include "tp_4_colas.h"
9
10
11
12 void limpiarBuffer() {
13     int c;
14     while ((c = getchar()) != '\n' && c != EOF);
15 }
```

The TERMINAL panel at the bottom shows the output of a compilation attempt, which failed with several errors:

```

A message at the bottom of the terminal states: "The terminal process failed to launch (exit code: -1). Terminal will be reused by tasks, press any key to close it."

The screenshot shows a GitHub repository page for `grupo6nicolasversaci`. The file `colas_arreglos.c` is selected, and its content is displayed in the main editor area. The file is located at `grupo6nicolasversaci / libs / colas / implementaciones / colas_arreglos.c`. The code in the file is as follows:
